1st Green Lab Symposium

23.11.2020

Sponsoring Concept

R&D is changing, don't be left behind

The Green Lab Symposium is the first laboratory symposium in Switzerland, for Switzerland. Our aim is to break down thought structures and create a platform for active exchange.

There will be keynote presentations on the current state of research and future perspectives. In addition, specialist presentations will highlight the needs of the various stakeholders such as researchers, users, planners, architects, investors, equipment suppliers, safety and maintenance specialists, authorities and energy suppliers.

Furthermore, interactive workshops on specific topics are offered for a creative solution finding process.

As you can see, the Green Lab Symposium 2020 is a unique networking opportunity in Switzerland with like-minded people. So bring your challenge and let the ideas of others inspire you!

Green Building Switzerland is a non profit organization. So do not miss the opportunity to support this initiative as a sponsor, please.
