Virtual Event

**1<sup>st</sup> Green Lab Symposium**  
23.11.2020

**How does Swiss research stay competitive and how will it become CO<sub>2</sub> neutral in the future?**

Lab buildings consume up to 10 times more energy than other buildings.

Do you have a dedicated strategy to manage energy consumption and to reduce the environmental footprint of your labs?

The boundary conditions for R&D are changing dramatically. The current concepts and solution do not meet future requirements.

Do you want to get to know promising concepts and solutions for your future?

Automation and digitalization will have ad most importance for R&D and your laboratory.

Do you want to see how digitalization will be the new foundation for the entire lab infrastructure and R&D processes?

Collaboration cross all disciplines is the result of the required cultural change in design, implementation and operation of future labs

Do you want to be part of this collaboration and drive it actively?

**Join the 1<sup>st</sup> Green Lab Symposium and act actively!**

## Agenda

Draft

- 08:30 Welcome from Green Building Switzerland
- 08:35 Agenda and program
- 08:40 Trends for Labs of the Future
- 09:00 Case Study "Research Campus Switzerland"
- 09:20 Case Study "UCL London"
- 09:40 BFE: Swiss energy and climate policy and green labs
- 10:00 Break
- 10:30 1<sup>st</sup> Panel Discussion: How sustainable are the Labs of the Future?
- 11:15 Case Study "Lab of the Future"
- 11:35 SUVA's view on safety of the Lab of the Future
- 11:55 Technical solutions for flexible labs
- 12:15 Why is digitalization the foundation for the Lab of the Future?
- 12:35 Break
- 13:30 2<sup>nd</sup> Panel Discussion: Lab of the Future – evolution or revolution?
- 14:15 Interactive Workshops: Safety, Flexibility, Sustainability
- 15:00 Break
- 15:30 Workshop presentations
- 16:00 Wrap up, Vote on priorities, next steps, Feedback
- 16:30 The end

This conference is supported by:

SAVIDA  
BY OFFICE VOITH

SIEMENS  
Ingenuity for life

## R&D is changing, don't be left behind

The Green Lab Symposium is the first laboratory symposium in Switzerland, for Switzerland.

Our aim is to break down thought structures and create a platform for active exchange.

There will be keynote presentations on the current state of research and future perspectives. In addition, specialist presentations will highlight the needs of the various stakeholders such as researchers, users, planners, architects, investors, equipment suppliers, safety and maintenance specialists, authorities and energy suppliers.

Furthermore, interactive workshops on specific topics are offered for a creative solution finding process.

As you can see, the Green Lab Symposium 2020 is a unique networking opportunity in Switzerland with like-minded people. So bring your challenge and let the ideas of others inspire you!
